## **PRESS RELEASE**

### **CONTROLTOUCH SYSTEMS RECEIVES APPROVAL FROM BNP ASSOCIATES TO BID ON CONTROL SYSTEMS FOR AIRPORT BAGGAGE HANDLING APPLICATIONS**

Louisville, KY – September 9, 2009 – ControlTouch Systems, Inc. (ControlTouch) is pleased to announce that it has fulfilled all requirements put forth by BNP Associates, Inc. (BNP) to be pre-qualified to bid on baggage handling system (BHS) projects as a control system contractor or subcontractor.

ControlTouch has been working with BNP since late 2008 providing both documentation and personal demonstrations to show its ability to conform to BNP's specifications for baggage handling system projects. These demonstrations included ControlTouch's Sortation Allocation Computer (SAC) solution, Maintenance Diagnostic Systems (MDS), upper and lower level control equipment and ControlTouch's reporting solution. Michael Harris, ControlTouch's VP of Operations and the leader in pursuing BNP approval stated, "BNP has been a very professional organization to work with. It is clear to see why many airports and airlines go to BNP for their BHS system designs".

"It was great working with a software company that had such flexibility in modifying their product to meet the airline industry's needs; we are looking forward to working with your team on many upcoming projects", stated Terry Cochran, BNP's Project Director.

#### **About BNP Associates, Inc.**

Established in 1971, BNP Associates, Inc. provides specialized consulting services to the air transportation industry worldwide. These services are directed at apron, air cargo, air express/mail and baggage handling systems, and cover master planning, analysis of system requirements, conceptual design, and bidding/tendering services among others.

BNP Associates has a sister company, BNP Technical Services, Inc., which provides computer controls system maintenance. BNP's clients include airlines, airports, government agencies, express companies and architects/engineers who specialize in airports. In the past five years, BNP projects represent a combined committed capital investment in excess of \$1 billion.

**About ControlTouch Systems, Inc.**

Headquartered in Louisville, Kentucky, ControlTouch Systems was founded in 1990 as a control system integration firm. The company specializes in the design and implementation of control systems for baggage handling and has integrated more than 100 EDS systems into over 20 in-line BHS systems since the events of 9/11. The company has worked as a subcontractor with most of the major BHS equipment suppliers and has worked with several airlines and airports directly.
